Petition in Support of the Preservation of the Ashley Schiff Park Preserve and Its Legal Designation as a "Forever Wild" parcel on the Stony Brook University Campus

We, the undersigned, wish to express our support for giving the thirty-nine year old Ashley Schiff Park Preserve a "forever wild" designation. Together with appropriate state legislation, this will ensure that the Ashley Schiff Park Preserve will always remain in its natural state, will never be developed, and will be available as a field site for academic programs of future generations of Stony Brook University students, and for the enjoyment of faculty, staff, students, and the surrounding community. We also feel that because it has been thirty-nine years since the Preserve was dedicated in Dr. Schiff's memory that the Preserve finally be given its originally intended and long overdue "forever wild" designation.
